No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                   407.5

Gen. Genet. 223:163-166(1990).

-!- FUNCTION: Ice nucleation proteins enable bacteria to nucleat crystallization in supercooled water.

-!- SUBCELLULAR LOCATION: Outer membrane (By similarity).
-!- DOMAIN: CONTAINS 153 IMPERFECT REPEATS OF THE CONSENSUS OCTAPEPTIDE A-G-Y-G-S-T-L-T; FURTHER ON A 16-RESIDUE AND A RESIDUE AND A RESIDUE AND A RESIDUE PERIODICITY IS SUPERIMPOSED.

-!- MISCELLANEOUS: A STRUCTURAL MODEL IS SUGGESTED IN WHICH THE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEATION PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED TO THAT OF ICE NUCLEARING PROTEIN DISPLAYS A SYMMETRY RELATED PROTEIN DISPLAYS A SYMMETRY RELATED PROTEIN DISPLAYS A SYMMETRY RELATED PROTEIN DISPLAYS A SYMMETRY RELATED PROTEIN DISPLAYS A SYMMETRY RELATED PROTEIN DISPLAYS A SYMMETRY RELATED PROTEIN
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      P18127;

Biochem. Parasitol. 48:173-184(1991).

-I. FUNCTION: Has an integral role during the inferint in the mammalian host.

-I. CATALYTIC ACTIVITY: Preference for hydrophobic pl' and basic residues at p2 and p3'. A model cleaved at -Ala-Tyr-|-Leu-Lys-Lys-.

-I. COPACTOR: Binds 1 zinc ion per subunit (By sim.)

-I. SUBCELLULAR LOCATION: Attached to the membrane.

-I. SIMILARITY: Belongs to peptidase family M8.
